

Access Audits - HSBC

Client: HSBC plc

Site: 180 sites across UK

Offer: Access audits, Design and Project Management overview

Overview

Evans Jones was appointed to carry out Access Audits of more than 180 sites across the UK. Following completion of the audits we were retained to design, procure, and supervise the fit out of adjustive works for over 30 of these sites.

Challenges

We were tasked with carrying out over 180 access audits over a large geographical area within a short time frame of 3 months. Working with the client we devised a standard audit format and list of adjustive works in order to achieve consistency at all sites. An additional challenge was to roll out the works across 30 sites whilst achieving value for money and consistency of application.

Results

We successfully completed all audit reports on time with consistent results. We then procured works across 30 sites achieving difficult consents for ramps and external alterations to many high profile sites in listed buildings. By procuring works from a single well organised contractor we were able to roll out a works programme in a short space of time with consistent results at all sites without affecting any of the branches trading.
