

University of Roehampton

Service: Access Audits
Location: London

Project Overview:

Evans Jones was appointed to carry out access audits of more than 40 buildings split over six separate sites, including the extensive gardens and grounds linking these sites together.

The buildings range from Grade I listed Georgian period buildings up to brand new purpose built facilities.

Challenges:

The main challenge was to complete all audits in a two month period whilst achieving consistent results. Based on our experience of bulk auditing programmes we devised a detailed programme using a team of 3 of our own trained auditors.

The Results:

The audits were completed on time and were delivered as per the programme. By using our own in house trained auditors we achieved consistent interpretation of results across all sites allowing the client sufficient information to prepare an adjustive works programme over the next 5 years.

“Once appointed, Evans Jones were professional, punctual and delivered exactly the product we required. I would have no hesitation in recommending Evans Jones to others” Paul Malcolm James, University of Roehampton
